

SynCut 150B

SYNCHRONIZED CUT-OFF SAW TO SEPARATE AND DIVIDE PROFILES

Highly dynamic and gentle on surfaces

YOUR ADVANTAGES

- ✓ High-quality cut
- ✓ Works without profile clamping, no deformations, no marks on the décor
- ✓ Cutting unit runs synchronised to the profile, cuts at full speed
- ✓ Available as a retrofit component to existing wrapping lines
- ✓ Control system recognizes cutting position automatically
- ✓ Ideal cut also when separating low-weight work pieces
- ✓ Up to 35 pulses /minute; works at up to 60 m/ min

APPLICATION

- ✓ Separating and cutting of profiles made from wood and wood composites with small to medium dimensions
- ✓ Comes with second transport belt for profile geometries that require additional stabilisation, like door casings
- ✓ Also available without transport belt
- ✓ Output increasing retrofit component for existing lines or final unit of a new line

REASON TO INVEST

**Great quality thanks to low tolerances
and design without profile clamping**
